

QUALITY CRAFTSMANSHIP AND INNOVATION

RFID SOLUTION CENTER: • TRAINING • INNOVATIVE PRODUCTS • PROFESSIONAL SERVICES

Coverage zones are contoured to give a quality fit to work flow requirements. Our installation system builds a complete 3D model of your RFID coverage.

Our Smart Bracket for the antenna allows easy mechanical beam tilting and recording of the settings.

We have invented a modular and highly flexible antenna rigging system which allows for multiple degrees of freedom to optimize antenna beam patterns.

We Make RFID Easy!
RFID THOUGHT LEADERSHIP

QUALITY CRAFTSMANSHIP AND INNOVATION (cont')

Each device is labeled with its IP address for easy troubleshooting.

Flex loom is used to protect coaxial cables and make the layout orderly.

The neighboring shelf was installed to hold the power conditioner.

TCP/IP and power protection is installed on every reader to ensure maximum longevity and protection from external power spikes such as lightning, etc.
